Exploratory data analysis

Cookies

The goal of this project its was to improve the product's quality by taking feedback from clients, while increasing the store's income .by placing the booth in top busiest stations.

To begin exploring this goal, find the 10 busiest stations for placing cookies booths, as well as the busiest days of the week.

I used a bar chart to plot which the busiest station to put the cookies booth and find out which day is the busiest station.
